

Game On!: What I Learned During My Time as the Shrink to the NY Jets - How to Achieve Anything You Want In Life!

Life is a lot like sports, as author Dr. Donna Dannenfels will attest to in her book about how she left a world behind to go after a dream. A dream that many told her was impossible. She began her journey as a young mother of three on Long Island, without any money and a psychology degree that she couldn't do anything with, and wound up as the mental health clinician to the NY Jets. This led to her creating the hit TV series, *Necessary Roughness* in 2011, which was based on her life, accomplishing this without an agent or a manager. Many have asked her how she did it. Dr. Donna takes you on her journey as she describes the ten things she learned along the way and how she has now turned them into 10 core beliefs that anyone can use to achieve their goals. Dreams do come true if you believe, is her mantra. Changing your thoughts will change your life is her truth. This book chronicles Dr. Donna's path, her struggles and disappointments, along with her successes and synchronistic happenings that presented themselves at just the right moments. Combining that with the belief she had in herself, the people she put on her team, and her intense desire to follow the road less traveled, she not only achieved her goals, she is able to leave the world just a little bit better than she found it by empowering others to live their best lives and not settle for anything other than their personal greatness. If you're looking for permission to break out of a situation that you can no longer tolerate, or you seem unfulfilled with what you're doing and have been disappointed by life in general, the 10 core beliefs in this book and the events that led to the acknowledgment of them can help you. You are never too young, nor too old, nor too poor, nor too challenged to make changes in your life and go after a dream. *Game On!: What I Learned During My Time As The Shrink To The NY Jets*, will reveal how to figure

out what makes you happy, along with the process for making it happen. In Donnas words, If I can do it, anybody can do it. Now lets get started!
