

ISO 4097:2000, Rubber, ethylene-propylene-diene (EPDM) -- Evaluation procedure

This International Standard specifies: physical and chemical tests on raw rubbers; standard materials, standard test formulations, equipment and processing methods for evaluating the vulcanization characteristics of ethene-propene-diene (EPDM) rubbers, commonly termed ethylene-propylene-diene rubbers, including oil-extended types. This title may contain less than 24 pages of technical content.
